

Users

This section, which is contained in the Settings Menu like shown in the image, shows the Users list. It's possible to assign **different roles and different accesses** to the xCally Shuttle Modules, for each User.

The Users table shows information about their Role, Status (if users are active or not), their Last Login date and if they are Administrators or not.

SHUTTLE POWERED BY xCALLY License Status ENGLISH Administrator

Through the web interface the Administrator can:

- Delete a User
- Edit the User parameters
- Define User's permissions
- Create a new User, by clicking on New User and compiling a form, where it's possible to indicate the User Role, his Status, his Module Permissions and if he is an Admin or not.

Create a New User and Manage his Permissions
